Education

Bachelor of Technology, Computer Science and Engineering Odisha University of Technology and Research (OUTR), Bhubaneswar	2023–2027 CGPA: 8.43
---	---------------------------------------

Technical Skills

Languages:	C/C++, Python, JavaScript	
Frameworks:	React.js, Node.js, Express.js, FastAPI, Bootstrap, Tailwind CSS	
Libraries:	NumPy, Pandas, Scikit-learn	“
Databases:	MongoDB	
Tools:	Git, GitHub, Vercel, VS Code, Figma, Overleaf	
Core Subjects:	Data Structures and Algorithms, OOP, DBMS, Operating Systems, Computer Networks	

Experience

Full Stack Engineer – [Coinslive.in](#) May 2026 – Jun 2026

- Engineered responsive React.js components for 15+ educational pages, improving accessibility and reducing UI inconsistencies across devices.
- Delivered scalable frontend features that enhanced content discoverability and supported a platform dedicated to reducing Web3 misinformation.
- Collaborated with cross-functional teams to implement user-centric interfaces, contributing to higher engagement and a seamless learning experience.

Junior Manager—AIESEC in India (Part-time) Feb 2024 – Nov 2024

- Spearheaded the planning and execution of organizational events while mentoring incoming members, driving effective team operations and seamless knowledge transfer.
- Collaborated with cross-functional and international teams to deliver community outreach initiatives, strengthening stakeholder engagement and supporting organizational growth in a fast-paced environment.

Projects

Task Time Management [Live](#) — [GitHub](#)

- Built a responsive task and time management application using **React.js**, featuring task creation, prioritization, completion tracking, and persistent storage to enhance productivity.
- Leveraged reusable components and React state management to deliver real-time updates and maintain a scalable, user-friendly dashboard experience.

SpeakEasy – Text-to-Speech App [Live](#) — [GitHub](#)

- Built a full-stack text-to-speech web app in under a week using **FastAPI (backend)** and **HTML/CSS/JS (frontend)**.
- Enables users to convert text into natural-sounding speech with **multi-language support (English/Hindi)** and downloadable MP3 output.
- Designed one-click setup and session history features, cutting setup time by **90%** and improving usability for **10+ active testers**.

Infinity Whiteboard [Live](#) — [GitHub](#)

- Built a real-time collaborative whiteboard using **Vanilla JavaScript, Vite, and Socket.io**, enabling synchronized multi-user drawing with vector tools, zoom/pan navigation, and remote cursor tracking.
- Engineered low-latency state synchronization with shared undo/redo history and scalable communication mechanisms, delivering a seamless collaboration experience.

Positions of Responsibility

- Junior Manager @ AIESEC in India** – Led cross-functional events and mentored new members, driving effective execution and fostering collaboration within diverse teams.
- Member @ Zairza (Tech Club, OUTR)** – Collaborated on technical initiatives and innovation-driven projects, contributing to a culture of learning and problem-solving.
- Project-Based Learner** – Designed and deployed 10+ personal projects, strengthening expertise in full-stack development, UI/UX design, and software engineering best practices.

Achievements

- Solved **200+ Data Structures and Algorithms problems** across platforms including LeetCode and GeeksforGeeks, strengthening problem-solving and coding skills.
- Gained practical software development experience through multiple internships, contributing to real-world projects involving AI and full-stack web development.
